## Company Strategy

### • Purpose:

To be a leader in the construction especially renewable energy industry by providing enhanced services, relationship and profitability for all our customers.

### • Vision :

To provide quality services that exceed the expectations of our esteemed customers and help our country to minimize power problem by providing all concerned service for effective renewable power projects.

### • Mission statement:

To build long term relationships with our customers and clients and provide exceptional customer services by pursuing business through innovation and advanced technology.

### • Core values:

- 1- We believe in treating our customers with respect and faith• we grow through creativity, invention and innovation.
- 2- We integrate honesty, integrity and business ethics into all aspects of our business functioning

### • Goals:

Regional expansion in the field of constructions and renewable power projects and develop a strong base of key customers.

- a. Increase the assets and investments of the company to support the development of services
- b. To build good reputation in the field of construction and renewable energy projects and become a key player in the future technology industry.

## Scope of Work

Triple m Construction Company providing all construction works and renewable power service and technology. The company undertakes all maintenance duties for all civil and electrical projects.

## Financial Considerations:

The company expects to reach the desired profits in the first year and does not anticipate serious cash flow problems. We believe that the average profitability per month for the first 3 years will be sufficient. Our goals to make profits by providing effective service.
